## EXPERIENCE

### Senior Fullstack Engineer

#### Riverside.fm

📅 02/2023 - 07/2026

Led technical initiatives within the Recording Studio, the company's core product area, focusing on scalability, performance, and long-term maintainability

- Improved the Recording Studio platform architecture to better support scalability and long-term maintainability
- Decomposed core business logic into GraphQL-powered microservices, enabling a more modular platform architecture
- Reduced frontend complexity through large-scale technical refactoring that improved maintainability
- Introduced AI-assisted engineering workflows and code review automation to streamline development practices
- Delivered features across engineering teams for one of the company's most business-critical products

### Frontend Team Lead

#### Realworld one

📅 02/2021 - 01/2023

Started as a Frontend Engineer and progressed into a Team Lead role responsible for both technical delivery and team management

- Built and evolved a client-facing VR/AR healthcare platform used to deliver product improvements
- Improved delivery planning and team coordination across engineering workstreams
- Expanded the team by contributing to hiring and recruitment efforts
- Strengthened team growth through mentoring and resource planning
- Shipped product improvements in close partnership with stakeholders

### Senior Frontend Engineer

#### Westwing Home & Living

📅 01/2020 - 02/2021

Played a key role in one of the company's largest frontend modernization initiatives

- Advanced the platform migration toward a decentralized micro frontend architecture
- Built and maintained a shared UI kit that improved consistency across frontend teams
- Migrated core checkout and payments functionality to support the broader modernization effort

## SUMMARY

Senior Frontend Engineer with 10+ years building and evolving modern web applications across e-commerce, media, healthcare, and insurance.

Led frontend architecture work, application modernization, and cross-functional delivery on business-critical products, with deep experience in React ecosystems, GraphQL-based architectures, performance optimization, developer experience, and technical leadership.

Focused on building maintainable software, mentoring engineers, improving development workflows, and shipping products that balance technical quality with business goals.

## KEY ACHIEVEMENTS

### Scalability Enhancement

Increased platform scalability by 35% through microservices architecture.

### Code Review Optimization

Reduced code review time by 40% with AI-assisted workflow.

### Stakeholder Satisfaction Achievement

Led team that delivered 98% stakeholder satisfaction.

### Frontend Optimization

Improved frontend load times by 25% with UI optimizations.

## SKILLS

### Frontend Engineering

React

JavaScript

TypeScript

## EXPERIENCE

### Senior Frontend Engineer

#### Mercado Libre

11/2015 - 10/2018

- Built and maintained purchase flow functionality across the platform
- Rolled out purchase flow initiatives across multiple Latin American countries
- Improved automation processes and engineering quality
- Strengthened testing practices within the engineering team
- Delivered scalable solutions in collaboration with multiple product teams

## TRAINING / COURSES

### Advanced React Patterns

Frontend Masters

### The Good Parts of JavaScript and the Web

Frontend Masters

## SKILLS

### Backend & APIs

GraphQL

REST APIs

Node.js

Microservices

### Leadership

Engineering Leadership

Team Growth

Hiring & Interviewing

Technical Mentoring

Cross-functional Collaboration
